LinkedIn: linkedin.com/in/nour-eldin-khater | **GitHub:** github.com/nour2303 | **Portfolio:** nour2303.github.io

Management Information Systems graduate with a data analysis internship at Egypt's Cabinet of Ministers. I turn data into clear reports for stakeholders and build AI workflows to reduce manual work.

SKILLS

Data analysis: SQL / MySQL, Excel, Power Query, Power BI, DAX, Python / pandas, stakeholder reporting

Automation: n8n, RAG, evaluations (evals), guardrails, LLMOps, multi-agent workflows, API integrations, Supabase / PostgreSQL, JavaScript checks

EXPERIENCE

Data Analyst Intern & Policy Lab Trainee
Jan to Feb 2026

Information and Decision Support Center (IDSC), Cabinet of Ministers of Egypt

- Cleaned and analyzed government data using SQL, Excel and Power BI, then prepared clear reports and visuals for non-technical stakeholders.
- Awarded the IDSC Policy Lab Certificate of Excellence for distinguished performance and analytical contribution, signed by the Assistant to the Prime Minister of Egypt.

Sales Trainee | Vesuvius Egypt
Jun to Jul 2025

Supported day-to-day business-to-business sales and pipeline activities during training.

IT Technical Support Trainee | PlastTec
Jan to Feb 2025

Helped log and troubleshoot hardware and software issues during training.

SELECTED PROJECTS nour2303.github.io/#work

Sales Analysis | Excel | 2026
Analyzed **113,000 sales records**, caught fabricated duplicate records and flagged them. Built an Excel dashboard showing which products made more profit (helmets at **59% margin**) and how discounts quietly ate into profit (cutting margins from **51% to 31%**).

E-commerce Sales Analysis | SQL, Power BI | 2026
Analyzed over **131,000 sales records** and found that **91% of revenue came from three categories**, showing a risk of relying on too few products. Built a Power BI dashboard showing lost sales, growing products and where to improve.

Firm Assistant | n8n, RAG, LLMOps, Evals, Guardrails
Built an assistant to answer document questions and query a database using RAG. Added automated evals, request logs and guardrails to route questions and keep SQL queries read-only.

Multi-Agent Research & Report Automation | n8n
Built a four-workflow multi-agent system to gather web sources, verify quotations against source pages and generate cited PDF reports with comparison charts.

AI Voice Receptionist | ElevenLabs, n8n, Google Calendar, Vonage
Built a bilingual AI voice receptionist in English and Egyptian Arabic that answers service questions, checks availability and books appointments. Sends an SMS after a booking is saved and logs requests needing staff follow-up.

EDUCATION & CERTIFICATIONS

University of Bedfordshire, United Kingdom | MSA University
2021 to 2025

Bachelor of Business Administration — Management Information Systems

- **Certificate of Excellence — Policy Lab (2026):** Information and Decision Support Center (IDSC), Cabinet of Ministers of Egypt (signed by the Assistant to the Prime Minister & Chairman of IDSC).
- **Google Data Analytics Professional Certificate:** Google.

Languages: Arabic (native) | English (professional working proficiency)
